Cassy Song: Time sheet. Fall 2013 ART 258				
Assignment	Time Estimated	Time Spent	Difference	Notes
1 - In class wireframes	45m	25m	20m	
2 - Sitemap	45m	120m	75m	Spent way too much time designing & aligning (I have issues). Also, took more time browsing through site than anticipated.
3 - Responsive Wireframe // Starbucks	7 hours	5 hours	2 hours	Alloted myself a lot of time. Figuring out the different sizes took some getting used to. Spent some extra time polishing up and checking for errors.
4 - Coded NEST Homepage	4 hours	5 hours	1 hour	
5 - Coded Starbucks Home & Card Page	2 hours	2 hours		I try to finish faster, but because I generally begin assignments ahead of time, I try to tweak certain areas when I have time before due dates. I'm not sure if this extra finessing should be tracked as well, but I just add it in anyway. Most of this assignment was done in-class, so that was very helpful. I struggled a bit with my button & border on the Card Page, but added a line height to make space since padding and margins weren't working. I also notice that my footer background color stops short on larger monitors. I think it has to do with the body background color being white, so the footer background color stops. I know we fixed this in Chris Gargiulo's class last semester by changing the body background color, but in this case I couldn't really remember how to rearrange all my divs and containers to do that.

Assignment	Time Estimated	Time Spent	Difference	Notes
6 - Midterm // Head Porter	12 hours	16 hours	4 hours	Breakdown of how my time was spent working on my midterm: Wireframe: 2 hours (Spent one hour prior to coding, then went back and re-did wireframe to properly reflect coded site. Design: Total of 3 hours (Spent one hour on each page—Home, News & About). Designed everything in photoshop first. Code: Total of 9 hours (Spent about 3 hours on each page—Home, News & About). Code Re-Edits: Total of 2 hours (Spent about 2 hours AFTER presenting Midterm to class fixing responsive issues that came up during critique. Also worked on redesigning the header and the News Page top section per critique feedback from Instructors).

Assignment	Time Estimated	Time Spent	Difference	Notes
7 - FINAL // NMA Re-Design	50 hours	59 hours	9 hours	Breakdown of how my time was speant working on my final: Creative Brief: 30 mins Wireframes: 3 hours Design: 13.5 hours Code: 34 hours Tweaks & Bug Checks: 8 hours Notes: I did my best to log everything as acurately as possible. I worked a lot on the design of the site (drawing a google map, drawing my icons, making mock-ups of student work for the gallery section). I also did a complete mock-up of the stie design in Photoshop because I find it helpful when grabbing image sizes correctly for the coding. When coding, I took my time and tried to get the overall structure down. I kept the design simple and clean. I also spent a lot of time trying to figure out the lightbox jQuery. At first it wasn't working, but later I was able to get it working. I really didn't know what I was doing and I had to research a lot online for help. Overall, I really enjoyed working on this project.
